Subject: Draft Final Addendum to the Site Investigation Sampling and Analysis Plan, 106 Rescue Group, New York Air National Guard, Westhampton Beach, NY

Dear Mr. Wing,

Included for your review and comment is our Draft final addendum to the original Sampling and Analysis Plan (SAP) (ABB-ES, 1991). The addendum adds two sites and changes the technical approach to be used. The SI field program will be conducted through the integration of several technologies to expedite the sample collection, chemical analyses, data interpretation, and reporting processes. The details of which are discussed in the addendum.

The SI field effort is expected to last approximately 14 weeks, if at all possible we would like to mobilize our contractors the week of 18 July 1994. This is assuming the SAP and addendum are acceptable and do not require major revision. My office will be available to help assist in any way that we can during the review process.

All comments should be addressed to Environmental Management at the above address. If you have any questions, please give me a call at (516) 288-7349.

Sincerely

SEAN M. WALTER
Environmental Manager
